

Contents

1. The AI trajectory in Bioengineering (Riccardo Bellazzi).....	p.	11
2. Generative AI and foundation models in brain encoding, decoding, and brain data (Nicola Toschi).....	p.	19
3. Basics of CNNs (Simone Palazzo)	p.	35
4. Autoencoders, Variational Autoencoders, GANs, and Diffusion Models: Principles, Loss Functions, and Medical Imaging Applications (Paolo Soda)	p.	51
5. Attention Mechanisms in Medical Deep Learning: Representation, Integration, and Interpretability (Alessandro Bria, Marco Cantone, Gabriele Lozupone, Domenico Paolo, Ciro Russo).....	p.	73
6. Cognitive Bias and Evidence Generation in Medicine: Impact on Generative AI Beyond Dataset Bias, Gloria Marchese, (Margherita A.G. Matarrese, Marianna Zarro, Marta Maria Romano, Filippo Crispino, Leandro Pecchia)	p.	89
7. Reproducibility in the age of generative AI: crisis or opportunity? (Giulia Raffaella De Luca, Stefano Diciotti)	p.	103
8. From Data to Decisions: XAI and LLMs for Data-Intensive Healthcare (Beatrice Amico, Carlo Combi, Matteo Mantovani).....	p.	121
9. Generative AI and human brain function: the role of LLMs (Fabrizio Esposito, Elena Giugliano, Marianna Chianese, Maria Agnese Pirozzi, Francesco Di Salle, Francesco Amato)	p.	135
10. DNA Foundation Models (Alberto Magi, Marta Baragli).....	p.	153
11. Generative AI in Clinics (Giulia Raffaella De Luca, Mario Mascalchi)	p.	167
12. Generative AI for Clinical Engineering (Alessio Luschi, Ali Salman and Ernesto Iadanza)	p.	177

13. Large Language Models for Clinical Decision Support (<i>Enea Parimbelli, Tommaso Mario Buonocore, Giovanna Nicora, Simone Rancati, Lucia Sacchi</i>)	p.	201
14. Generative AI in Bioengineering: Acceleration, Infrastructure, and Responsible Use (<i>Arnaud Ceol, Lucia Floresta, Matteo Zanaroli, Davide Salomoni</i>)	p.	229
15. Toward reliable coherent cross-modal synthetic data: a novel framework for generative model construction and validation (<i>Giuseppe Jurman, Raffaele Marchesi, Walter Endrizzi, Gianluca Leonardi, Matteo Pozzi, Flavio Ragni, Stefano Bovo, Monica Moroni, Federica Rignanese, Marco Chierici, Venet Osmani, Nicolò Lazzaro</i>)	p.	241
16. Responsible Artificial Intelligence (<i>Barbara Di Camillo</i>)	p.	255
